

Tele-Deposits

Tele-Deposit service allows merchants to authorize and deposit credit card transactions, using a touch-tone telephone, in one easy step. It provides merchants with many of the conveniences of electronic point-of-sale credit card transaction processing, without the additional equipment and associated costs. Tele-Deposit is ideal for merchants who require a low cost credit card processing solution.

Features

- Authorize and deposit credit card sales from anywhere using a touch-tone phone
- Save time since there is no need for the merchant to call in for an authorization
- Save money as it helps reduce expensive charge-backs

Benefits

- Helps reduce fraud exposure - all card transactions are authorized electronically
- Eliminates costly mistakes - totals can be balanced and if a review or correction is needed, a transaction can be recalled and corrected
- Improves cash control and reduces transaction time
- Save trips to the bank - end-of-day balancing of all outstanding transactions is done automatically
