

- ▶ Browser-based transaction processing for all major cards
- ▶ Supports recurring billing and batch processing
- ▶ Comprehensive real-time reporting

# Global Transport™ – Virtual Terminal & Batch Solution

WEB-BASED TRANSACTION PROCESSING AND REAL-TIME, ONLINE REPORTING CAPABILITIES

Global Transport – Virtual Terminal & Batch Solution is a secure, virtual terminal and batch solution for processing all major credit card transactions including Visa®, MasterCard® and American Express® quickly and easily over the web. Whether you sell online, over the phone or face-to-face, with Global Transport you can accept and process transactions directly from your PC.

In addition, Global Transport allows you to automate your recurring billing process – an excellent feature for subscription and membership-based organizations.

With this same solution, you can also process batches of transactions, which do not require real-time authorization, making this an ideal solution for parking lots, insurance companies and utilities.

Global Transport also offers data retrieval and management information reporting 24 hours-a-day. Access real-time transaction data with “point and click” convenience.

## FEATURES

- ▶ Web-based transaction and batch processing
- ▶ Comprehensive real-time reporting of critical information with extensive online search capabilities
- ▶ Supports an unrestricted number of simultaneous users
- ▶ Employs industry standard secure data encryption technology – 128-bit Secure Socket Layer (SSL)
- ▶ Automates recurring transactions
- ▶ Batch processing and reporting

## BENEFITS

- ▶ Interface requires minimal disk space on PC; application upgrades are automatic
- ▶ Simplifies transaction research and reporting
- ▶ Increases merchant productivity
- ▶ Encryption standards and security protocols safeguard customer information
- ▶ Helps to reduce collection expenses, manual entry errors and administrative costs
- ▶ Helps save time, enhance security and reduce errors

# Global Transport – Virtual Terminal & Batch Solution
